DETAILED ACTION

Election/Restrictions

1. Claims 1 – 9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 3.

Claim Objections

2. Claim 10 is objected to because of the following informalities:

No period to end the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10 – 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leach et al. (US Pat Pub 2003/0056081 A1) in view of Aipperspach et al. (US Pat 4,849,904).

Regarding **claim 10**, Leach et al. disclose a read-only memory system where read-only data is stored in combinatorial logic (paragraph 0150, lines 6 – 10).

Although the binary logic function disclosed by Leach et al. is not specifically adapted to receive two binary address bits, Aipperspach et al. however have shown such system (col. 6,

Art Unit: 2818

lines 5 – 8), which generates a plurality of binary values from said two address bits and a plurality of logic functions (col. 6, lines 10 – 18), said read-only data including at least one of said plurality of binary values (col. 10, lines 40 – 44).

Therefore, it is considered obvious to one of ordinary skill in the art, at the time the invention was made, to include the binary logic function shown by Aipperspach et al. to the read-only memory system of Leach et al. so that various logical functions are implemented for versatility purposes.

Regarding **claim 11**, Leach et al. disclose the read-only memory system of claim 10, further comprising at least one multiplexer ... (paragraph 0091, lines 1 – 6).

Regarding **claim 12**, Leach et al. disclose the read-only memory system of claim 11, wherein said at least one multiplexer is adapted to select a subset of said at least one of said plurality of binary values based upon at least one address bit, ... (fig. 51, either select bit from SEL24, SEL25, or SEL 26 to the corresponding multiplexer, being distinct from the address bits).

Regarding **claims 17 and 18**, Leach et al. disclose the read-only memory system of claims 11 and 12, further comprising at least one decoder for decoding said at least one address bit (paragraph 0171, lines 7 – 12, the one address bit here is a LSB).

Regarding **claim 16**, Aipperspach et al. also show the 2:1, 4:1, 8:1, and 16:1 multiplexers (col. 6, lines 34 – 59).

Regarding **claims 13 – 15**, the examiner takes an Official Notice that the logic functions consisting of AND, OR, XOR, NOT, NAND, NOR, and XNOR are considered common and well known in the art.

Allowable Subject Matter

5. **Claims 19 and 20** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. When responding to the office action, Applicant(s) are advised to provide the examiner with the page and line numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

8. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02(b)).
